ROTARY SWEEPER

http://tiny.cc/rotarybroom

FEATURES & BENEFITS

Remotely controlled hydraulic angle adjustment

• Long lasting bristle material

• Equipped with extendable supports for storage: nylon brush doesn't get damaged during storing

• Direct drive transmission, low maintenance

Dirt, dried mud, light snow and other debris are quickly and efficiently swept away this hydraulically driven attachment. Whether you're sweeping driveways, farm yards or warehouses, you can rely on the rotary broom to get the job done right.

The brush can be hydraulically tilted 30° both on the right and on the left comfortably from the driver's seat. There are two adjustable wheels that keep the height of the brush constant from the ground and an elastic joint able to absorb small shocks avoiding possible

damages. The sweeper is equipped with supports which can be extended when the sweeper is not in use, so that the sweeper rests on the supports and the nylon brush doesn't get damaged during storage. Combined with a MultiOne machine with fully cab it is the right attachment for the autumn and winter maintenance. Note: the floating boom valve on the machine is suggested.

Model	Brush Diameter		Brush Material		Brush Width			Brush Width at Max Angle		Weight		Code			
130	60 cm (23.6 in)		nylon		130 cm (51.2 in)			113 cm (44.5 in)		160 kg (353 lbs)		C890241			
160	60 cm (23.6 in)		nylon		160 cm (63 in)		in)	139 cm (54.7 in)		190 kg (419 lbs)		C890242
