

LAWN MOWER

<http://tiny.cc/lawnmower2>

FEATURES & BENEFITS

- Equipped with automatic stop valve
- Floating system guarantees easy operation and good mowing result also on uneven lawns
- Rear or side discharge as standard, mulching kit available as an option
- Four puncture free tires

Ideal for fine cut applications, such as golf courses and large acreage mowing. The mower has been designed with three blades (two blades on mod. 100) that cut with an overlap witch prevents uncut strips.

MultiOne's extensive design experience makes the mower very reliable and assures a high quality cut. The independent four wheels support of the mower frame allows the mower deck to follow ground contours. It is equipped with the MultiOne floating system, which guarantees optimal touch with the ground also on uneven lawns. The mower is also equipped with an automatic stop valve which blocks the blades when the mower is lifted off the ground. Moreover, thanks to the MultiOne telescopic boom, it is possible to cut the grass even under trees and bushes where the conventional mowers could not reach. The mower mod. 100 is mulching type as standard. Mulching kit is available as an option on models 120, 150 and 180.

Note: the floating boom valve on the machine is suggested.

Model	Width	Cutting Height	Weight	Code
Lawn mower 100 with mulching system	100 cm (39.4 in)	1-12 cm (0.4 – 5 in)	116 kg (256 lbs)	C895081
