POWER HARROW

http://tiny.cc/powerharrow

FEATURES & BENEFITS

- Professional, efficient rotary harrow for topsoil levelling
- Top grade finish with just one pass
- Can be equipped with seeding unit ready lawn surface in a single pass

MultiOne power harrow is an excellent leveler for lawn beds, yards, gardens etc. – for places where the ground needs to be perfectly levelled. It harrows only the topsoil and gives a very nice finish for sowing. Working depth is adjusted by the rear field roller that levels the seeding bed during operation.

The optional seeding unit allows to make a ready lawn surface on one pass.

Power harrow is most commonly used for lighter topsoil levelling.

Note: the floating boom valve on the machine is suggested.
