FEATURES & BENEFITS

- New efficient design increases volume and visibility
- Bolt-on Teeth and Cutting edge available
- Heavy duty (HD) models available for hard works

The new design of the MultiOne bucket increases the volume and enables good visibility. The inside of the bucket is completely plain and the sides open forward in slight angle which guarantees easy and complete filling and emptying of all kinds of materials. There are narrow holes at the upper end of the bucket which improve visibility and prevent stones from falling towards the operator. The special design allows to stack the buckets one inside the other saving storage space (until 6 on a pallet). Available with cutting edge and teeth.
